Dear Dear Hiring Manager,

I am writing to apply for an entry-level role in **Data Analytics, Machine Learning, or Artificial Intelligence**. As a **Computer Science and Engineering** student at **SRM Institute of Science and Technology**, I have developed strong technical and analytical skills through both academic learning and hands-on projects.

During my studies, I worked on projects such as *Medifinder*, an AI-powered medicine locator, and *Posture Spine Recognition*, a computer vision system designed to detect spinal alignment in real time. These projects helped me strengthen my skills in **Python, SQL, Power BI**, and **machine learning frameworks** like **scikit-learn** and **TensorFlow**, while improving my ability to turn data into actionable insights.

What drives me most is the process of solving real-world problems through data and automation. I enjoy building intelligent systems that make decisions smarter and faster. I am eager to bring that same curiosity and commitment to a professional team where I can learn, contribute, and grow as an AI and data professional.

Thank you for taking the time to review my application. I look forward to the opportunity to discuss how my skills and interests align with your organization's goals.

Sincerely,
RAVULA CHARAN
